NATURAL DEODORANT

Ice Guard Natural Crystal Deodorant, £4.49

This is an incredible find; with all the benefits of a natural crystal deodorant, but none of the downsides. Applying it is like rubbing the smoothest marble over your skin – there's no stickiness or residue, and certainly no risk of white marks. It's unscented, and gentle enough to use directly after shaving and one application is enough to keep you fresh for at least 24 hours. Quite possibly the closest thing to a magic wand for the armpits that you'll ever come across!

HIGHLY COMMENDED

Tisserand Purifying Deodorant; Organic Tea Tree, Lemon & Rosemary, £5.25

This is an uplifting roll-on deodorant that is pleasing on the skin, and there's no need to do the 'zombie walk' while you wait for it to dry. With tea tree, lemon and rosemary oils

this fulfills its promise of being 'naturally active and purifying'.

Lavera Basis Sensitive Deo Roll-On, £7.25

This is a particularly gentle formulation, ideal for those with especially sensitive skin – but it's hard-working too. The organic aloe vera gel and calendular extract soothe and nurture; whilst a tingle upon application reminds you that there's witch hazel in it too.

Jason Lavender Deodorant Roll-On, £3.99

Enriched with certified organic tea tree oil, vitamin E, and corn starch, this is soothing on the skin; and a single application provides all-day freshness. This product is composed of the highest quality, naturally sourced ingredients.

Origins, No Offense Alcohol-Free Deodorant, £11.74

The most expensive of the finalists, but the full, almost edible scent, reminiscent of freshly made berry jam, edges it onto the shortlist. It does go on easily, and dries conveniently quickly. Keep it in your handbag for reapplying.
